

Helios Robotics - HX-200 Warranty and Support Terms

1. Scope

These terms describe the warranty, support plans, repair process and software support that Helios Robotics provides for the HX-200 warehouse robot and its accessories. They apply to all customers unless a signed customer agreement says otherwise.

2. Standard warranty

2.1 Warranty period

Every new HX-200 comes with a standard warranty of 24 months from the date of delivery. During this period, Helios repairs or replaces defective parts free of charge, including labour.

2.2 Battery warranty

The battery is covered for 36 months or 2,000 charge cycles, whichever comes first. A battery is considered defective if its capacity falls below 80% of the original value before either limit is reached.

2.3 Extended warranty

Customers can extend the warranty with the Helios Care Plus programme, either by 12 months or by 24 months. Care Plus must be purchased before the standard warranty expires.

2.4 Exclusions

The warranty does not cover damage caused by misuse, accidents, unauthorised modifications or repairs, use outside the specified temperature range, liquid ingress beyond the IP54 rating, or use for purposes other than those in the operator manual. Wear parts such as drive wheels are excluded except when they fail because of a manufacturing defect.

3. Support plans

3.1 Standard support

Standard support is available from 08:00 to 18:00 CET, Monday to Friday, excluding Bavarian public holidays. Support is provided by email and through the customer portal.

3.2 Premium support

Premium support is available 24 hours a day, 7 days a week, by phone, email and portal, and includes a named technical account manager.

3.3 Response targets

Support tickets are prioritised as follows.

- P1 (robot fleet stopped or safety-related): Premium first response within 1 hour, Standard within 4 business hours.
- P2 (major function impaired): Premium within 4 hours, Standard within 1 business day.
- P3 (question or minor issue): Premium within 1 business day, Standard within 2 business days.

Response targets measure the time to the first response from a support engineer and are not resolution times.

4. Repairs and returns

4.1 RMA process

To return a defective part or robot, open a ticket in the customer portal and request a Return Merchandise Authorisation (RMA). The RMA number is valid for 14 days, and the goods must be shipped within this period. Returns without an RMA number are refused.

4.2 Turnaround

Standard repairs are completed within 10 business days of the goods arriving at the service centre. Premium customers are eligible for advance replacement: a replacement unit ships within 2 business days, and the defective unit must be returned within 14 days after the replacement arrives.

4.3 Returns of new robots

Undamaged new robots can be returned within 30 days of delivery, subject to a restocking fee of 20% of the purchase price. Customised robots cannot be returned.

5. Spare parts

Helios guarantees spare-part availability for 7 years after the end of sale of the HX-200. Wear parts such as drive wheels, LiDAR windows and bumpers can be ordered in the customer portal.

6. Software support

6.1 Firmware lifecycle

Each firmware version receives security patches for 5 years after its release. Minor releases are published every quarter and a major release is published once per year, in the first full week of March. Customers should install all updates within 60 days of release.

6.2 Fleet software

HX-Fleet is provided as a hosted service or as an on-premises installation. Hosted customers are updated automatically. On-premises customers must install updates within 90 days.

7. Training

Helios offers the HX Operator Level 1 course, which lasts 4 hours and is required for anyone operating the robot, and the HX Operator Level 2 course, which lasts 8 hours and is required for maintenance technicians. Courses are held on site or online. The first on-site course for a customer is included in orders of 5 or more robots.

8. Limitation of liability

Helios is not liable for indirect damage such as lost profit or production downtime. The total liability of Helios for any claim is limited to the purchase price of the affected robot. Nothing in these terms limits liability that cannot be limited by law.

9. Contact

Customer support: support@helios-robotics.example. Premium customers can use the phone number in their customer portal. For safety-related events at a customer site, always call the Premium hotline or email support with the subject "SAFETY".

10. Frequently asked questions

How long is the standard warranty for the HX-200? 24 months from the delivery date.

What is covered by the battery warranty? 36 months or 2,000 charge cycles, whichever comes first.

How fast will support respond to a P1 ticket? Premium customers get a first response within 1 hour; Standard customers within 4 business hours.

How long is an RMA number valid? 14 days.
